## KORAPUT

# DISTRICT SURVEY REPORT, KORAPUT

(Under Ministry of Environment, Forest & Climate Change, New Delhi, Notification Date 15-01-2016.)

## **INDEX**

<b>Sl. No</b>	<b>Particular</b>
1	Introduction
2	Origin of the Name of the District
3	Location, General Boundaries
4	Population as per 2011 Census
5	District as an Administration Unit
6	Geography of the District
7	Mineral Wealth
8	Rain Fall data
9	Forest
10	The List of Mining Leases in the District with location, area and period of validity
11	Health

# **PROFILE OF THE DISTRICT**

## **1. Introduction**

The present Koraput district forms a part of the legendary Dandakaranya or Dandaka forest which has been lavishly described in the most famous Indian Epic, the Ramayan. From that time it has retained its pristine beauties in shape of flora and fauna, rolling mountains, undulating meadows, terraced valleys leading upto verdant hills, roaring waterfalls, oozing springs, green-yellow scene of primitive crops, soothing climate, simple populace with aboriginal culture, which inspires tourists to the land to compare their experiences with that of Kashmir- the heaven on earth. Koraput with her golden autumn and misty mornings of the rainy days, her painted spring and slumbering summer and her winter ranging from fierce to mild provides varieties of living in different seasons, rare elsewhere.

## **2. Origin of the Name of the District**

According to Mr. R.C.S. Bell, the name of the town is \_Kora-Putti' or —the hamlet of the —Nux-vomicall and it is derived presumably from Kora that must at one time have been prominent near the site. Some opine that the word is derived from KHORA a sect of people who still inhabit nearby villages. According to the second theory, Koraput is a corrupted form of \_Karaka- Penth'. Karaka literally means \_hail-stone'. Another opinion is often found that the term Kora that means the Sun God who was worshipped by the local tribals in ancient times. Hence the town was so named.

## **3. Location, General Boundaries.**

The erstwhile undivided district of Koraput has been divided into four districts, namely, Koraput, Rayagada, Malkangiri and Nowrangapur in 1992. So the present Koraput district is located between 18 degree 13' and 19 degree 10' North Latitudes and 82 degree 5' and 83 degree 23' East Longitudes. On the extreme North it is bounded by Nabarangpur district, on the West by Bastar district of Chattisgarh State, on the South by the district of Malkangiri and on the East by the districts of Vizianagaram and Srikakulam of Andhra Pradesh State. Its area is 8807 Sq.Kms.

## **4. Population of Koraput District (As per 2011 Census)**

According to 2011 Census total population of this district is 13, 79, 647. The table given below indicates the profile of population in this district.

<b>SI No</b>	<b>Unit</b>	<b>Total</b>	<b>Male</b>	<b>Female</b>
1	Population (Total) - 2011	1379647	678809	700838
2	ST Population	697583	337373	360210
3	SC population	196540	96789	99751
4	Literacy (Total)	568090	340843	227247
5	Literacy Rural	404425	250926	153499
6	Literacy Urban	163665	89917	73748

## **5. District as an administrative unit**

The district is now in charge of a District Magistrate and Collector with headquarters at Koraput. In 1992, Koraput was divided into four districts. Present Koraput district has now two subdivisions with the Tahsils as shown against them Koraput Sub-Division: Koraput, Nandapur, Machkund, Pottangi, Semiliguda Bandhugaon, Narayanpatna, Laxmipur and Dasamantpur. Jeypore: Sub-Division.Borigumma, Jeypore, Kotpad, Kundra and Boipariguda.

Fourteen Tahsils are co terminus with fourteen Blocks vide Notification No. 17662, Dated 19.04.2008 and No. 33533 / R &DM, Dated 06.08.2008 of the Government in Revenue and Disaster Management Department Government of Odisha. There are 23 Police Stations in the district.

## **6. GEOGRAPHY OF THE DISTRICT**

The whole district can be divided into two geographical divisions each of which can be separated by natural barriers as their respective limits with undulated Koraput sub division and plain Jeypore sub division. The portion of plateau which lies in the Koraput district consists of an undulating table land profusely scattered with hundreds of little hills of remarkable similarity in appearance. The process of denudation has advanced too far and the hills are either covered with low scrub or disfigured with patches barred by shifting cultivation. The average rainfall of the plateau is 1560 mm and of this the greater part falls during the months of July and August. It is drained westward by the rivers, Indravati, Kolab and southward by the Machkund towards the Godavari valley. This plateau is really a rare gift of nature for its scenic beauty. This is not so in case of Jeypore Sub-division which is more or less plain.

### **Hill System**

This district lies on a section of the Eastern Ghats and consists of two natural divisions having mean elevations of 915 and 610 meters respectively above the sea level. There are number of mountain ranges and isolated hills that rise out of these table lands. Taking them in order from north to south the most notable heights are Panchapat Mali (1336.89 mtrs), Karnapadi Dongar (1487.5 mtrs) Meyamali Parbat (1500.30 mtrs) Turia Dongar (1598.78 mtrs), Deomali (1672.56 mtrs), Polamakani Parbat (1585.67 mtrs) and Sirimanda Parbat or Damuku (1415.24 mtrs). The village Pottangi lies at the foot of the last named Damuku. Deomali, also known as Duhdari, whose twin peaks can be clearly seen from Koraput on any fine day, is the highest mountain peak in the district as also in the whole of Odisha.

In Jeypore sub-division there are low hills, some of which rise to 793 mtrs. Elsewhere, the plain is only broken by isolated hills, among which those near Podagada (930 mtrs), Borigumma (916 mtrs) and Boipariguda (927 mtrs) may be mentioned.

### **River system**

The district has many rivers and perennial streams. Almost the entire Koraput district is drained by four rivers namely the Indravati, the Kolab, the Machkund and the Champabati or Jhanjabati, with their tributaries. These rivers flow inland westward and the southward into the valley of the Godavari.

## **7. Mineral Wealth**

Koraput district with its fascinating natural beauty, rich tribal cultural heritage has a potential reserve of bauxite, limestone, decorative-dimension stone which fetches crores of rupees annually as royalty for State Exchequer and supports the industrial progress of the state. There is also promising gemstone occurrence and gold mineralization within the district

The following paragraphs are a brief account of the economic minerals of the district. The important major mineral of the district are Bauxite, limestone and china Clay.

The following table gives the list of working mining activity of Koraput district

Sl. No	Location the mining lease	Name of the lease	Name of the Mineral	Average monthly mineral excavation quantity in M.T	Average monthly mining revenue credited to Government Treasury
01	Panchapattamali Bauxite, Mines,	M/S NALCO Ltd	Bauxite	5 Lakhs	7 crore
02	Ampavalley Limestone Mines	M/S IDC Ltd	Limestone	30,000	24 Lakhs

Although there has been no sustained prospecting, it is well known that the district is rich in mineral deposits the Important and economic viable mineral deposits in the district also include Clay, Limestone, Manganese, Mica, Dimension Stone, Graphite, Soap Stone, Semi precious stone and Granite etc.

## **8. Rainfall**

Average Rainfall report of Koraput District from 2014-2019 (in MM).

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Total
2014	1.82	4.03	44.61	37.12	104.45	156.36	509.72	400.55	258.76	202.30	3.07	4	1726.79
